Twining Project JO 04/AA/OT/03  
**Kick-off Meeting**

JISM Contribution, Ensuring Necessary  
Working Conditions & Provision of  
Necessary information/ Cooperation  
with Partners

**By Rula Madanat**

# JISM Contribution

- Availability and commitment of staff for training
- Prevent fluctuation of trained staff
- Ensure openness to new ideas and solutions, and apply lessons learned and incorporate them in JISM systems
- Allocate funds within JISM budget to cover its share of cost of events and tasks
- Provide access to enough information and documents

# JISM Contribution

- Provide logistics for the work of experts and for training & seminars
- Coordinate with stakeholders to specify their needs for exports and the internal market, to prevent overlapping and duplication of tasks and to get support from policy makers
- Coordinate the project Steering Committee meetings and participate in the steering committees of other relevant MSTQ projects
- Ensure sustainability of all established systems and maintain their operation

# JISM Specific Contribution

## ❖ Component A: Accreditation

- Prepare for EA/ILAC peer assessments and commitment to close corrective actions
- Prepare of QM documentation, policies and TC rules to expand accreditation scope
- Assessors pass assessor exams
- Assessors participate in joint assessments and perform witnessed assessments
- Coordinate with policy makers and CABs to increase awareness on accreditation and accelerate the independence of the JAC

# **JISM Specific Contribution**

## **❖ Component B: Conformity Assessment**

### **Laboratories**

- Amend QM documentation as a result of assessments
- Implementation of technical aspects (PT schemes, calibration, uncertainty, validation of test methods & internal quality assurance) as a result of training and consultation

# JISM Specific Contribution

## ❖ Component B: Conformity Assessment

### Certification

- Coordinate with stakeholders & prepare articles to promote JQM & CE Mark
- Amend certification system and QM documentation as a result of assessments and implement them to gain accreditation
- Assessors participate in witnessed assessments

# JISM Specific Contribution

## ❖ Component C: Market Surveillance

- Cooperate with policy makers & stakeholders to introduce a modified Market Surveillance system, technical regulations and harmonized standards
- Prepare Market Surveillance procedures, laws and decrees and cooperate with policy makers to pass the legislations
- Coordinate with industries and traders for awareness on the modified Market Surveillance

# JISM Specific Contribution

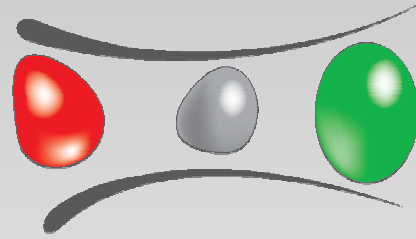

## ❖ Component D: Standardization & Information

- Develop measures to increase participation in preparation of standards
- Prepare rules for standardization work and procedures for project management including balloting
- Establishment of an editing division
- Develop programs to automatically check data in databases
- Determine customers needs for new information services

# JISM Specific Contribution

## ❖ Component E: Metrology

- Prepare a new law for legal metrology and NCL and coordinate with policy makers to pass the law
- JISM provides budget for Asia Pacific Metrology membership and for calibration of working standard
- JISM ensures that NCL implement corrective actions as a result of pre-assessments to prepare for accreditation
- JISM ensures that budget is allocated for maintaining calibration of reference standards
